

# Canine Reproduction Seminar

by Dr. George Hillis

Saturday, February 12, 2011

Learn about the latest reproduction technology, Transcervical Insemination. Dr. George Hillis of East Oshawa Animal Hospital will show “real-time” video of the procedure from start to finish, explaining the features and benefits for you and your animals. He will explain the step-by-step protocols of various artificial insemination techniques and requirements, and finish with a Q&A session.

## TRANSCERVICAL INSEMINATION

- An Alternative Method for Intrauterine Insemination
- Less invasive than surgical insemination
- Fewer complications for the bitch
- Little or no anaesthetic
- Less cost for the breeder

*Don't miss this exciting new technique!*
