Use this link for more on-line seminar information.

Dr. Dodds is a renowned veterinarian with 44 years experience as a research and clinician scientist, and has received numerous awards for her contributions to veterinary medicine. As well as being an authority on the topics being presented at this seminar, Dr. Dodds has done extensive work on inherited and acquired bleeding disorders. In 1986 she established Hemopet, the first nonprofit national blood bank programme for animals, providing canine blood components, blood bank supplies and related services throughout North America. On behalf of Hemopet, Dr. Dodds consults in clinical pathology nationally and internationally, and teaches hematology, blood banking, immunology, endocrinology, nutrition and holistic medicine.
