

Companion Animal Wellness Lectures

April 19, 2014 - 6pm

◆ Heritage Park, Chilliwack BC – Show Office ◆

★ Tellington Touch ★ Homeopathic Remedies ★ ★ Bio-energetics ★

★ An introduction to Tellington Touch ★ Margaret Perry & Deborah Bridgman

TTouches introduce new alternatives into the world of dog training.

The circular TTouches activate brain wave patterns that in human studies have been shown to be present during the learning process.

Doing the TTouches on dogs relates to them in an entirely new manner, inciting the part of the brain that allows the dog to learn, making the training an easier, more humane procedure.

The TTouch is done on the entire body, and each circular TTouch is complete within itself. Therefore it is not necessary to understand anatomy to be successful in speeding up the healing of injuries or ailments, or changing undesirable habits or behavior.

★ “Homeopathy for Dummies” ★ Michael Bridgman & Deborah Bridgman Using, Applying and Expected Results

★ An introduction to: Bio-Energetics ★ Dr.Philip Burn

The Bio Energetic Synchronization Technique (B.E.S.T.) is a technique which is widely used by health care practitioners all over the world.

B.E.S.T. is a physical yet non-forceful, energy balancing procedure used by the hands to establish the full healing potential of the body using it's natural healing abilities.

B.E.S.T. removes the interference and/or distractions that are demanding the attention of the healing power; thereby causing the imbalance in the autonomic nervous system, and ultimately leading to disease and or ability to heal from injury.

Remarkable results for injury, arthritis, hip dysplasia, behavior issues etc.

Researched at major universities, taught in association with many chiropractic colleges and in professional continuing education seminars, B.E.S.T. is recognized by the health care industry as an effective healing science.

Q & A session at the end of the lectures

**EXTENDED
DEADLINE
